

PRODUCT BULLETIN

BIOCIDE ST 40

MICROORGANISM CONTROL AGENT

GENERAL DESCRIPTION

BIOCIDE ST 40 is a one-component, stabilized, liquid oxidizing microorganism control agent.

PRINCIPAL USES

BIOCIDE ST 40 provides efficient and effective control of microbiological growth and associated deposits in industrial cooling towers, once-through cooling systems and pasteurizers. The product is fast acting and effective against almost all microorganisms.

BIOCIDE ST 40 is a stabilized oxidizing microorganism control agent with good biofilm penetrating and removing characteristics.

BIOCIDE ST 40 is designed to effectively penetrate and remove slime deposits and to control the microbiological growth in cooling systems.

PRODUCT BENEFITS

- Increased efficiency over chlorine chemistry at high pH and in the presence of ammonia
- Low volatility –less halogen losses due to stripping
- Extended stability – available longer for biocontrol
- Minimal reaction with organics – less AOX formation
- Reduced attack on organic inhibitors
- One drum product - easy to feed and apply
- Effective control of Legionella

DOSAGE

The specific dosage of **BIOCIDE ST 40** varies depending on the severity of the biological contamination and the nutrient availability. The average dosage for total residual halogen is 0.2-1 ppm.

Your local representative will recommend the optimum dosage necessary to ensure maximum program performance according to your specific system parameters.

FEEDING

BIOCIDE ST 40 should be fed continuously or shocked to a location in the system where it will be uniformly mixed and thoroughly distributed or close to the problem area.

BIOCIDE ST 40 is an off-gassing liquid, therefore suction lines shall be kept short, dosing pumps shall be installed low down to minimize suction lift, and a degassing valve with bleed back to the container is necessary.

MATERIALS: Storage and application equipments (pumps, lines) should be made of PE, PP, PVC, Vinyl, Viton, Hypalon, Kynar or PTFE. Do not use carbon steel, stainless steel 304 and 316, EPDM, Brass, Aluminum, Neoprene, PU or Buna-N in contact with the neat product.

HANDLING-STORAGE-SHIPING

As a standard precaution with all chemicals we recommend the use of personal protective equipments such as goggles and rubber gloves when handling. Consult the Material Safety Data Sheet as the only official source of Environmental and Safety information.

BIOCIDE ST 40 can be stored for at least 24 months from date of shipping if kept in its original, unopened container and under normal warehouse conditions. Protect from freezing and from exposure to high temperature.

BIOCIDE ST 40 is available in non-returnable containers of different sizes.

REMARKS

If you need assistance or more information on this product, please call your local supplier.
