Applications

- 1. Chelate for cement:** fixed amount of sodium gluconate in cement, then make the concrete strong and random. It can be delay the first time and the last time for solidity.
- 2. For Medicine Industry:** adjust the body acid-base balance to restore the normal nerve. For the same purpose apply to food additives
- 3. Cleaning Agent for Steel Surface:** the steel surface must be exacting cleaning before plate Bo, Cr, Sn, Ni, then it can be integrated well. Now the sodium gluconate play a very important effect.
- 4. Special Cleaning Agent for Glass Bottle:** main ingredient is sodium gluconate, this cleaning agent can improve those problems: can't remove dirt directly. Block the nozzle and the pipeline. Residue after washing is not ideal edible security, after wash water caused public nuisance.
- 5. For panting and film industry**
- 6. For Food Industry:** produce additive prevent low sodium
